Historic Rebuilds

Preservation of classic vehicles

Besides restoring each vehicle, Historic Rebuilds also tells the history of where each car were manufactured, and how many remain.

How much time do I have to commit?

Your commitment with the show could be as little as four hours or several days. It all depends on your time and availability. The longer you commit, the longer you will appear on the show and more air time/exposure you will receive. We can shoot your segment at your place or at our garage in Hamilton.

What's in it for me?

You will have a chance to show off your skills and promote your business. The show will air on numerous time slots and there will be re-runs throughout the year. There is no monetary benefit, however, we will mention your contribution during the show or via product placement. The advertising value of reaching a local, national and global audience is much greater than its monetary value. You can also use specific clips to help promote your own business.

What type of cars will I be working on?

The cars could range anywhere from 1930s to 1980s. We fit the right car based on your level of knowledge or challenges you may want to tackle.

The show aims to reach out to a targeted audience of youth and adults between 16 and 70.
